EXPERIMENT 7

Integrating a Zoho Creator Application with Another Zoho Service Using Connections and APIs

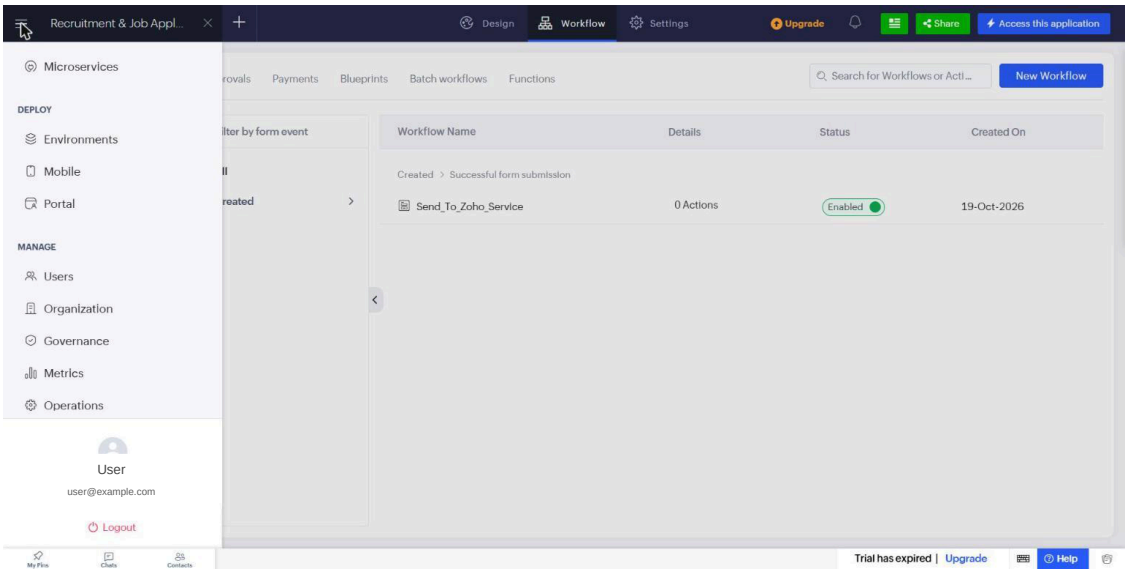

Application: Recruitment & Job Application Management

Aim

To integrate the Recruitment & Job Application Management application with another Zoho service (Zoho CRM) by creating a connection in Zoho Creator, so that submitted job application data can be sent to that service.

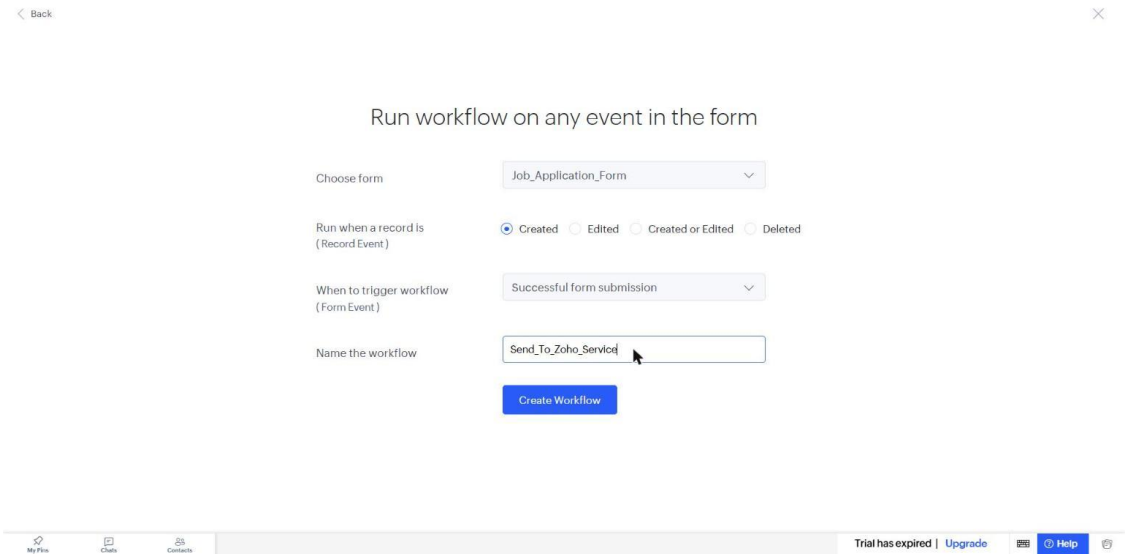

Procedure

1. Sign in to Zoho Creator and open the application builder. The signed-in account name, User, and its email address are shown at the bottom of the left menu (Figure 1). Open the **Workflow** tab and click **New Workflow**.

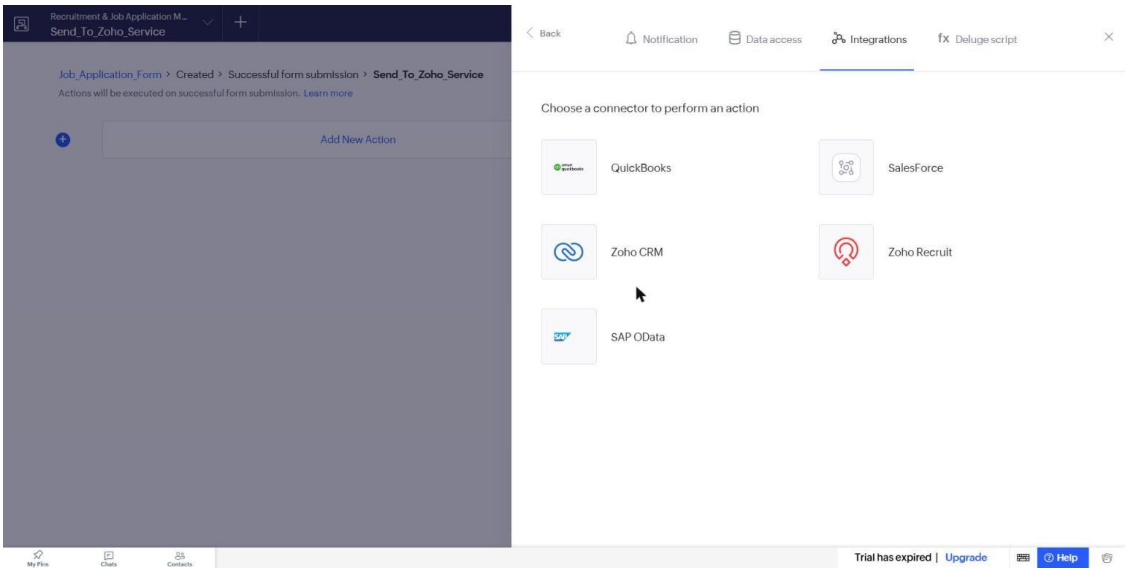

Account shown in the application builder

2. Choose the form **Job_Application_Form** and the record event **Created**. Under When to trigger workflow, select **Successful form submission**. Type **Send_To_Zoho_Service** in Name the workflow (Figure 2) and click **Create Workflow**.

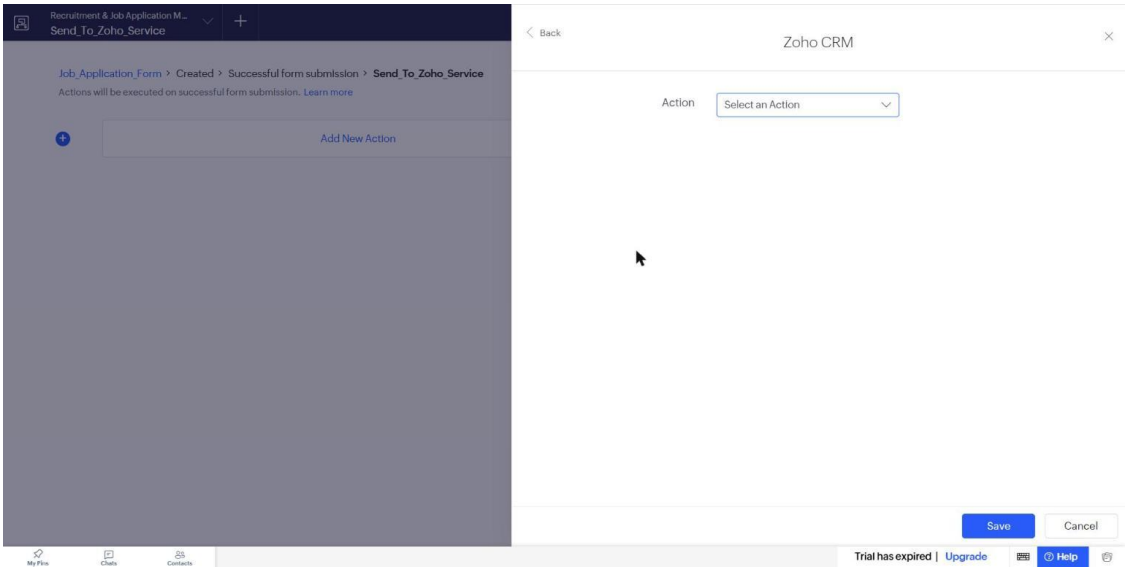

Workflow settings

3. In the workflow builder, click **Add New Action** and choose **Integrations**. The list of connectors is shown Select **Zoho CRM**.

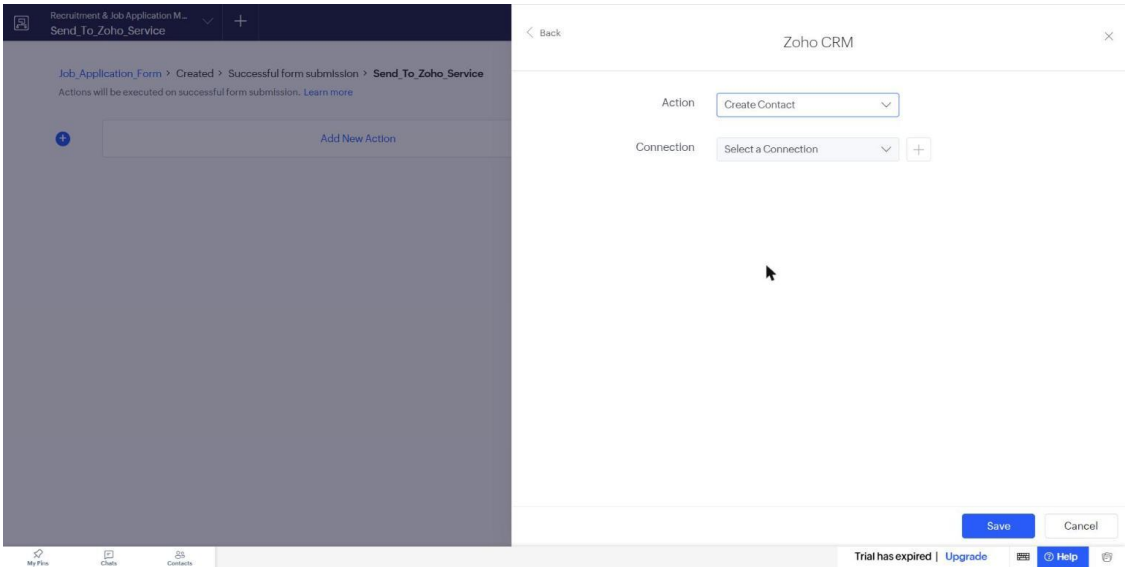

Integration connectors

4. In the Zoho CRM screen, open the **Action** list and choose **Create Contact** (Figure 4).

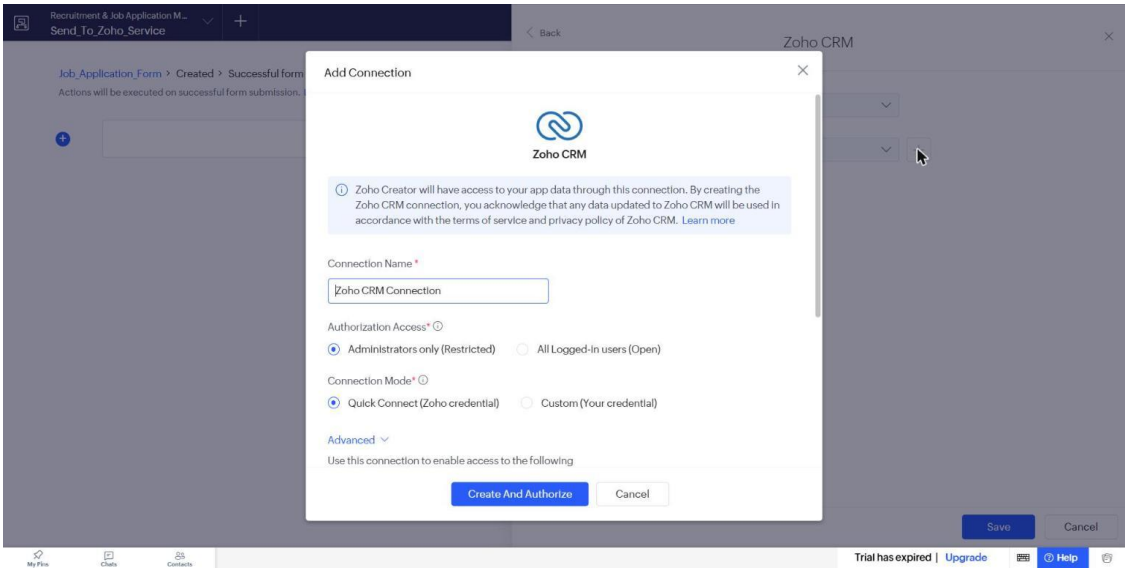

Zoho CRM action screen

5. A **Connection** field appears with a + button beside it (Figure 5). Click the + button.

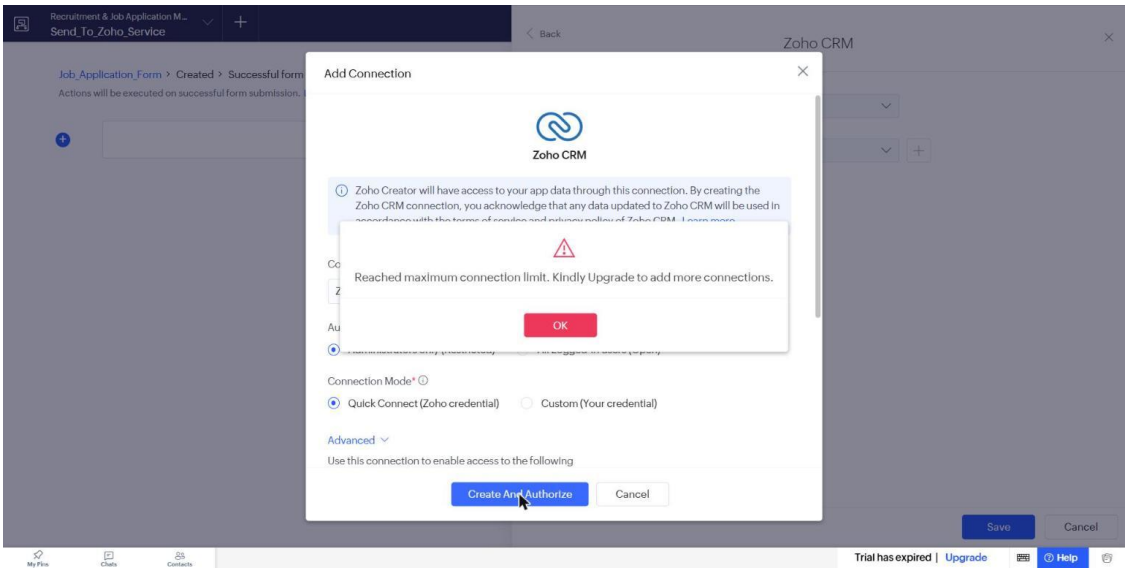

Create Contact action with the Connection field

6. The **Add Connection** window opens (Figure 6). The default connection name is Zoho CRM Connection, the authorization access is Administrators only, and the connection mode is Quick Connect (Zoho credential). Click **Create And Authorize**.

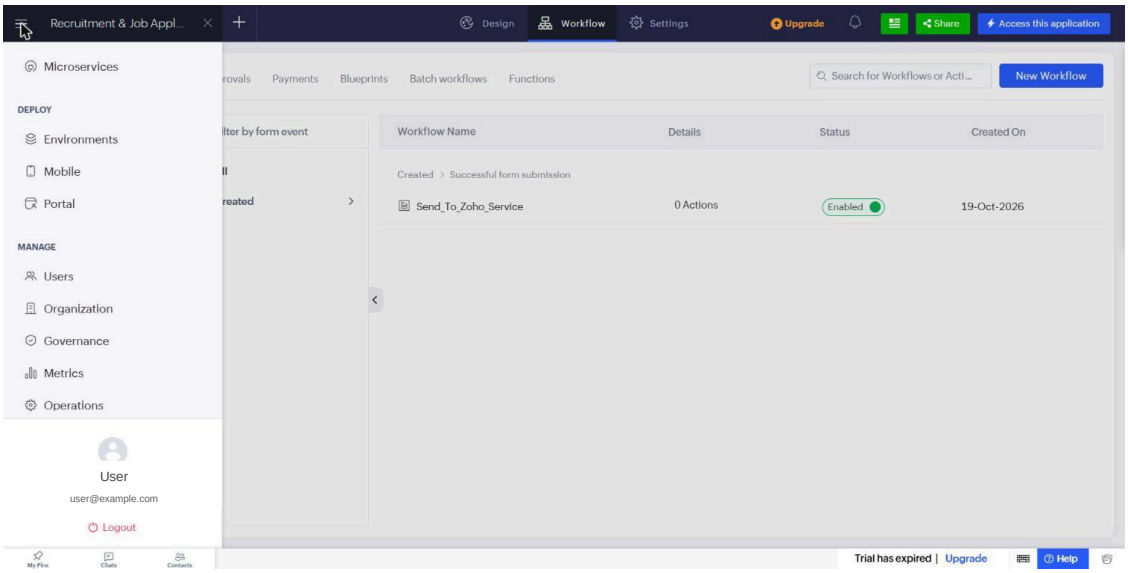

Add Connection window

7. Zoho Creator shows the message **Reached maximum connection limit. Kindly Upgrade to add more connections.** (Figure 7). Click **OK**, then **Cancel** to close the window.

Connection limit message

8. The action was not saved. The workflow Send_To_Zoho_Service stays in the Workflow tab with 0 Actions (Figure 8).

Workflow list showing Send_To_Zoho_Service with 0 Actions

Result

The workflow Send_To_Zoho_Service was created on Job_Application_Form, and the Zoho CRM integration with the Create Contact action was selected. The connection could not be created. Zoho Creator refused it with the message Reached maximum connection limit. Kindly Upgrade to add more connections. The page also shows that the trial has expired. Because of this, the connection to Zoho CRM was not authorized, the action was not saved, and no data was sent to Zoho CRM. The integration is therefore not completed.
